The Cocktail

A 'Mixed' Drink for the new Millennium

WHAT IT IS:

- A powerful, liposomal blend of natural, plant-based antibiotics

WHY YOU NEED IT:

- Targets patients with Chronic Inflammatory Response Syndrome
- Important for patients diagnosed with chronic infections, Lyme disease, 'co-infections', parasites, and chronic viral syndromes
- Supports patients with Chronic Fatigue, Fibromyalgia
- Organic, non-GMO ingredients

HOW IT HELPS:

We have entered the era of the 'SuperBug,' the highly resilient, nearly unstoppable bacteria that laugh at modern antibiotic drugs and evade our immune systems. If you are reading this handout, then you or someone you love has been diagnosed with an infection by one of these mighty microbes. Fortunately, Mother Nature has provided some natural remedies that can help patients recover from SuperBug infections.

The Cocktail is the brainchild of Seattle physician, Dietrich Klinghardt, MD, who has championed the fight against these chronic, debilitating infections. Having cured himself from one of these SuperBug infections, Dr. Klinghardt developed this remedy to support the body in its attempts to rid itself of these overwhelming infections. Think of The Cocktail as the neutron bomb of natural antibiotic therapy, a broad-spectrum biocidal treatment that finds the little critters wherever they are hiding in your body.

The many iterations of this cocktail has been used successfully by thousands of patients for more than a decade because its effectiveness is based on a dual action molecular model. First, the cocktail contains a blend of well-regarded and potent herbs that have been used medicinally for generations. When lives are on the line, these are the herbs experts count on for therapeutic success. Secondly, the cocktail uses liposomal

technology to deliver these herbs directly to the parts of the body where they are needed most.

A liposome is a tiny, nano-sized ball of fat, the same fat that makes up the cells of your body. When you swallow a liposome, the body treats it as one of its own cells, ushering it past the digestion process and right into the blood stream. Inside every liposome in The Cocktail is a tiny amount of the world's most powerful, natural antibiotics. Once inside the blood stream, the liposome releases its potent payload of disease fighting herbs, like a nano-version of the Trojan Horse. This provides a therapy that's nearly equivalent to having the herbs injected intravenously.

To enhance detoxification and the effectiveness of the cocktail, take five (5) to twenty (20) BioPure Chlorella tablets and one scoop of BioPure MetalSweep thirty minutes before (or two hours after) each dose of The Cocktail.

Usual Dosage: Start with seven (7) drops twice daily and gradually work up to two droppersfull twice daily. Take on empty stomach when possible.

Cheers!
