Cocoa IQ

Smarter By Nature

WHAT IT IS:

- An innovative blend of brain-boosting nutrients

WHY YOU NEED IT:

- Important for patients wanting improved brain health
- Targets patients with reduced brain sharpness and depression
- Good for patients with Age-Related Memory Loss
- Supports patients with Mild Cognitive Impairment
- All natural, no side effects

HOW IT HELPS:

Cocoa IQ is a mind-boosting formula that features an ultra-pure cocoa extract that supports a healthy balance of brain chemicals necessary for optimal mental sharpness and data recall. Clinical testing has demonstrated that participants using the cocoa extract in Cocoa IQ performed better on tests of short term memory and thinking speed.

When stripped of the over-processing and sugar found in chocolate 'sweets and treats', the main ingredient in chocolate, cocoa, has been shown to be of great support to the aging brain.

Nothing rots your brain out faster than sugar, and nothing may nourish your brain better than purified cocoa extract. If you can separate out the sugar from the cocoa, you've got a winning formula: Cocoa IQ.

For even better performance, Cocoa IQ is packed with other clinically tested ingredients that promote healthy brain functioning on many levels. These ingredients include phosphatidylserine, acetyl-L-carnitine, Bacopa, curcumin, and Ginkgo biloba.

Whether by supporting healthy brain metabolism, structure, or processing speed, Cocoa IQ has everything you need to regain your mental edge.

Cocoa IQ: it's chocolate for the intelligent crowd.

Usual Dosage: Take three (3) capsules once or twice daily, preferably on an empty stomach. As this supplement contains Ginkgo biloba, it should be discontinued one week prior to surgery.
