ForeSure

The 'Stay-Healthy' Probiotic

WHAT IT IS:

- The World's only chewable probiotic that protects you from the bugs that cause colds and flu

WHY YOU NEED IT:

- Puts the 'good' bacteria where infections start – in your mouth and throat
- Supports defense against the bad bacteria that cause colds and flu
- Important for patients looking to prevent colds and flu
- Sugar-free and all natural

HOW IT HELPS:

Everyone knows that taking 'good' bacteria probiotic supplements are important for gut health.

But did you know that there are 'good' bacteria in your mouth and throat that can fight off the 'bad' bugs which cause colds and flu?

ForeSure contains some 2 billion of these very special 'good' bacteria that can help defend your mouth, nose and throat against the common cold and flu. Instead of swallowing this unique probiotic, you chew it or let it dissolve in your mouth. Used in this way, ForeSure can release an army of healthy bacteria that can track and kill the 'bad' bacteria that cause upper respiratory infections.

Having been tested in clinical studies, you can rely on the power of ForeSure to be an important first line of defense.

ForeSure is safe for both kids and adults, and when used regularly, should make you more clinically bulletproof.

Chew a ForeSure tablet two to three times daily for optimal results.

Can't afford to get sick again. Do what I do: Sanitize your hands regularly. Eat only with clean hands. Touch your face only with clean hands. Take ForeSure.

And the next time someone sneezes or cough near you, you'll be glad you did.
