# Game-On

### Pain stops. Life starts

#### WHAT IT IS:

Powerful botanical support for inflammation

#### WHY YOU NEED IT:

- Important for patients with acute and chronic pain due to inflammation
- Targets patients with arthritis, back pain, neck pain, tendinitis, bursitis
- Good for patients who cannot take aspirin or anti-inflammatory drugs
- Gluten-free, vegetarian formula
- Safe, non-habit forming
- Fast acting

#### **HOW IT HELPS:**

Game-On is a blend of all natural, herbal extracts that work synergistically to support patients in pain due to inflammation. A little inflammation is part of the healing process of any injury. But when the injury was years ago or the inflammation gets out of hand, pain levels go up and activity levels go down.

Prescription and over-the-counter anti-inflammatory drugs can bring inflammation under control, but many patients are concerned about side effects. And rightly so. These chemicals are responsible for over 100,000 admissions to hospitals every year. Additionally, anti-inflammatory drugs can be hard on the intestines, liver, and kidneys.

Game-On uses a proprietary blend of five of the World's most powerful antiinflammatory herbs to target the source of inflammation. Special processing is employed to achieve faster and higher blood levels of these beneficial ingredients.

It is not enough just to swallow a pill; the ingredients have to be fully absorbed and get to where they need to go.

The technology used to create Game-On ensures maximum power that you can quickly feel. Our reputation depends on it, and patient feedback from Game-On has been overwhelmingly positive.

Can't take a break from pain?

Take Game-On...and get going.

**Usual dosage:** Take two to three caps with food, every six (6) to eight (8) hours as need for symptoms.
