# Liver Champ

## WHAT IT IS:

- Natural supplement to support liver function

## WHY YOU NEED IT:

- Important for patients wanting to optimize liver metabolism of hormones, heavy metals, and toxins
- Replenishes vitamins lost when taking birth control pills
- Supports healthy homocysteine levels

Between what we inhale, swallow, and absorb through our skin, our livers are working overtime helping to clean our “dirty” blood. Liver detoxification uses a tremendous amount of vitamins and nutrients.

Over time, these nutrients are depleted, and this weakens the liver’s ability to clean and protect us. When well stocked with the nutrients in Liver Champ, the liver can perform its essential features, including reducing the chances of disease such as cancer.

Homocysteine is a molecule found in the blood that, when elevated, increases the risk for Age-Related Macular Degeneration (the leading cause of blindness in adults), osteoporosis, premature heart attacks and strokes. Taking Liver Champ regularly can help to reduce homocysteine to normal levels.

## HOW IT HELPS:

Liver Champ provides the key nutrients necessary for one of the essential liver detox functions, methylation. Without the ability to methylate, the liver cannot neutralize dangerous environmental toxins, disease-causing hormone metabolites, and routine waste from our cells.

If you are taking birth control pills or hormone replacement therapy, Liver Champ can help assure that your liver is well stocked with the tools necessary to keep you healthy and protected.

Patients with elevated blood levels of homocysteine can also use Liver Champ to manage this important risk factor. With the ingredients in Liver Champ, the liver can neutralize the homocysteine risk. If you regularly take Liver Champ, expect to see the improvement on your next blood test.
