Neo40 Professional

A Nobel Prize in Every Pack

WHAT IT IS:

- Natural supplement that boosts Nitric Oxide blood levels

WHY YOU NEED IT:

- Supports normal, healthy blood pressure and blood flow
- Good for patients with High Blood Pressure
- Targets men with Erectile Dysfunction
- Important for patients with atherosclerosis and heart disease
- Necessary for patients on acid-blockers (Prilosec, Nexium, Prevacid, Protonix, Aciphex, Tagamet, Zantac, Pepcid, etc.)
- Safe and all natural
- Proven effective and manufactured by University of Texas researchers

HOW IT HELPS:

You may never have heard of 'Nitric Oxide' gas (no, it's not the laughing gas at Dentists' offices...that's Nitrous Oxide), but your body makes some every second.

Nitric Oxide is a gas constantly produced by cells that line our arteries. This gas is immediately used to dilate the arteries to improve blood flow. Nitric Oxide gas can also protect the arteries from cholesterol deposits and the formation of dangerous plaque.

Our bodies make lots of Nitric Oxide when we are young, but as we age, the production of Nitric Oxide declines. For example, most men will make about half the Nitric Oxide at 40 than they will at 20 years of age.

How do men know their Nitric Oxide is declining? With their built-in 'dipstick.'

Remember, Nitric Oxide dilates arteries, and this includes the arteries in the penis that are necessary for erections. Less Nitric Oxide production means a less firm erection. Many men will admit that their erections at 40 are not as hard as they were at 18.

All of the 'Viagra-type' drugs work by increasing penile Nitric Oxide.

But Viagra isn't going to treat your high blood pressure, cholesterol plaque, or heart disease. Neo40 Professional works to support healthy blood flow, healthy blood pressure, healthy arteries in both sexes...and healthy erections in men.

University of Texas researchers produce Neo40 Professional based on their clinical studies of how Nitric Oxide is made in the body.

Here's where the Nitric Oxide story gets fascinating.

Turns out, there is a little patch of special bacteria that live on the very back of our tongues. The only job of these bacteria is to convert the natural nitrate molecules found exclusively in green vegetables into nitrites. You then swallow the nitrites and your stomach acid converts nitrites into nitric acid. The nitric acid gets absorbed into your blood stream, and the arteries convert nitric acid into Nitric Oxide gas.

Amazing!

So, without enough greens in your diet, without those bacteria on the back of your tongue, and without stomach acid, you can't make enough Nitric Oxide gas...and then you start to age more rapidly. Without sufficient Nitric Oxide, your blood pressure and cholesterol problems go up and (in men) your penis goes down.

Any course of antibiotics and all of those anti-septic, anti-bacterial mouthwashes (the ones that promise to kill bacteria on contact) will also kill off those mission-critical bacteria on your tongue that help you make your Nitric Oxide. So, yes, you have to decide whether you want fresh breath today or an erection tonight. Hey, this is not my design; I'm just the messenger.

Neo40 Professional protects and nurtures that colony of tongue bacteria so they can help keep your whole body healthy by pumping up your Nitric Oxide production.

Are you a patient who has been taking acid blockers...for months...for years? These drugs were never meant to be taken that long, and all of them have an FDA package warning to not use them for more than 14 days! No stomach acid...no Nitric Oxide gas...no good.

Of course, your mother always told you to eat your greens, and now you know why. Including greens in your diet just became a lot more important for your blood pressure, your heart attack risk, and your sex life. To ensure you get enough greens, use the MyBestHealth Green Gems powder twice daily, and always with any meal that doesn't have some 'green' in it...like oatmeal.

The body is an incredible, intricate machine, and the better you understand how it works, the better you will be at keeping it running strong and smooth. Neo40 Professional is a great tool to help maintain your health.

Usual Dosage: Let one Neo40 Professional lozenge dissolve on the back of your tongue, twice daily, on an empty stomach.

Then...watch...as bad things go down, and good things go up.
