OzoLabs

Europe's gift for topical ozone therapies

WHAT IT IS:

- Organic personal care products made with superb European organic oils, specifically selected for their therapeutic properties

WHY YOU NEED IT:

- Targets patients with skin conditions including acne, eczema, psoriasis, fungal/yeast infections, wounds/burns, bacterial infections, viral infections (including Herpes, Shingles)
- Important for anti-aging skin care
- Supports healthy, youthful skin
- Gentle enough for all skin types
- Unmatched European quality

HOW IT HELPS:

Ozone is a naturally occurring gas found in both the environment and inside your body. Neither the planet nor you could exist very long without ozone. Ozone is both protective and nourishing for both Mother Earth and all those who inhabit her.

Ozone is an integral part of my daily medical practice, and if I were forced to choose to practice medicine with only one tool, it would be ozone.

With modern technology, ozone gas can be trapped in oil, a process called ozonation. Ozonated oils can release ozone when applied topically to the skin, thereby unleashing ozone's healing, disinfecting power. No bacteria, virus, yeast, mold or fungus can sustain a direct ozone attack. This is why many city water systems (including Los Angeles') use ozone to clean municipal water supplies.

In addition to its antibiotic properties, ozone's power can also support clear, healthy, even-toned skin with reduced wrinkling, spotting, and signs of aging.

OzoLabs uses a blend of organic oils, and through a proprietary process, adds ozone to these ordinary oils that turn them into topical superstars.

The OzoLabs Cream makes a great therapy when anti-aging, antibiotic, rash-reducing power is needed. The cream blends nicely and cleanly into skin without any residue.

The OzoLabs Oil is best for more troubling skin conditions and injuries that require a thicker layer of therapy and protection.

The OzoLabs Soap also contains ozonated oils is great for daily cleansing of the face and is not harsh nor drying like most soaps. The lather can also be used to cleanse wounds and rashes.

The OzoLabs Anti-Aging Eye Contour Cream is wonderful for reducing fine lines, wrinkles, puffiness and dark circles around the eye area.

The OzoLabs Intense Care Cream is perfect for Tattoo and Laser procedure skin recovery.

Finally, ozonated Toothpaste from OzoLabs is a great addition to your personal care regimen, helping to prevent and/or reduce cavities and oral infection.
