PARASPECT

Blend of Anti-parasitic Herbs

- Natural support for patients with parasites
- Great for patients wanting parasite-free, intestinal health
- Targets patients with intestinal parasites and related symptoms
- Important formula as part of a comprehensive detox program
- Herbal and non-habit forming

When we think of parasites, we think of other people, in other places, far from our homes and busy lives. After all, we mostly eat at home, choose good restaurants, usually wash our hands before eating, and always after using the toilet.

So, how could you have parasites?

Easy. There are thousands of types of parasites which have spent eons of time perfecting their techniques to get into your body and hijack your intestines.

The dictionary defines parasite as “an organism that lives on or in an organism of another species, known as the host, from the body of which it obtains nutriment.” These little critters are more than just the worms you read about in high school biology.

Parasites can be the size of a single cell, small enough for 1,000 of them to huddle together on the end of a fork completely unnoticed by you.

Paraspect is designed to support patients who have been diagnosed with intestinal parasites.

Patients with constipation tendencies can use ColoBrite or DynaMove when taking Paraspect to ensure healthy bowel function.

For patients without significant colon regularity issues, ColoBrite in combination with Paraspect is usually sufficient to support patients wanting two to three proper and complete bowel evacuations daily while doing a parasite cleanse. For patients with more significant constipation, DynaMove in combination with Paraspect will help support patients wanting a thorough parasite cleansing.

Usual Dosage for Paraspect: Take two (2) to three (3) Paraspect tablets at breakfast and at bedtime.

Combine with either ColoBrite or DynaMove, and take with Paraspect. Use this herbal combination six days per week, three weeks per month, for three months to complete a cycle.
