Poly-MVA

For Energy, Immune Support, and Cellular Protection

WHAT IT IS:

- Uniquely formulated, patented combination of vitamins, minerals and amino acids

WHY YOU NEED IT:

- Important for patients with low energy, nerve conditions, dementia, mitochondrial conditions
- Supports patients with cancer and weak immune systems
- Targets patients with premature aging, heart disease, diabetes, and auto-immune diseases
- Fast-acting, immediate absorption for quick results
- Safe and natural

HOW IT HELPS:

Poly-MVA is a patented blend of system critical vitamins, minerals and amino acids. The core ingredient in Poly-MVA is a palladium-lipoic acid complex, that acts as an effortlessly soluble liquid crystal. This highly absorbable complex allows for key nutrients to be directly delivered to the body's energy-producing systems, such as cellular mitochondria.

Better energy production means that patients feel better faster. Typically, within a week or two.

These nutrients also support overall health and wellbeing. For patients whose bodies are under attack from toxins, oxidation, high blood sugar, and high cholesterol, Poly-MVA targets patients looking for scientifically proven damage protection and faster recovery times. This is particularly important for sensitive body systems including nerves, arteries, and brain tissue.

Poly-MVA represents a breakthrough in nutritional supplementation for patients with difficult-to-treat conditions including chronic fatigue, neuropathy, dementia, cancer, arteriosclerosis, heart disease, auto-immune diseases (Lupus, Rheumatoid Arthritis, Multiple Sclerosis), and weak immune systems.

Poly-MVA is available in both oral and IV forms. The Poly-MVA IV is the most powerful nutritional delivery system, bringing the fastest and most powerful effects of the supplement to patients. To continue the Poly-MVA benefits at home, the supplement is also available for oral daily dosing.

For patients with cancer, Poly-MVA IV combined with DCA (another anti-cancer IV therapy) helps to support patients needing to target cancer stem cells. Killing cancer stem cells is absolutely necessary for successful cancer therapy.

If your body has a system that is broken down, worn-out, weak or tired, chances are very good that a course of Poly-MVA (IV and oral dosing) will support your better health and wellbeing.
