# ZeoBind

## Safely Removing Unwanted Toxins

### WHAT IT IS:

- A charged mineral that binds to toxins for healthy detoxification

### WHY YOU NEED IT:

- Supports the removal of heavy metals, pesticides, radioactive metals, and chemicals
- Great for patients with mold toxicity, mycotoxins
- Necessary for patients with glyphosate (RoundUp) toxicity, exposure
- Important for patients with food poisoning, diarrhea, ulcers and heartburn
- Targets patients who need to reduce fluoride toxicity
- Lowest in Aluminum
- All natural, well tolerated

### HOW IT HELPS:

ZeoBind contains a specific type of zeolite, a special type of fine, clay powder that forms as molten lava hits cold seawater. When this primordial phenomenon occurs, a three-dimensional, honeycomb micro-tube is created which maintains a powerful negative ionic charge.

The negative charge of the zeolite structure traps positively charged metals, toxins and poisons. Once tightly bound to the zeolite, these dangerous substances can be safely carried out through the body's detox pathways like the colon or urinary system.

Zeolite has been used medicinally for millennia to support gastrointestinal health, normalize pH, bind excessive bile acids, reduce blood sugar, stimulate the immune system, and remove potentially irritating and hazardous natural and manmade toxins and chemicals.

There are many forms of zeolite available on the market, and many of these are unsafe because they contain too much naturally-occurring aluminum, the most abundant mineral in the Earth's crust. High doses of aluminum consumed over time can be harmful to brain health.

ZeoBind contains a special form of zeolite called clinoptilolite which contains the lowest levels of naturally occurring aluminum. This makes ZeoBind the safest and most effective zeolite for your detoxification needs. No sense pulling out one toxin only to insert another (aluminum) as many zeolite products inadvertently do.

ZeoBind is powerful and reliable detoxification for the safe removal of Man's and Nature's worst toxins and poisons.

**Usual dosage:** Take 1 scoop (approx. 1 gr) one to three times daily. Take before meals for detoxification.
