GEEWHIZ

You won't believe what this little supplement can do!

WHAT IT IS:

- A natural annatto plant extract for anti-aging, healthy skin, and pain management

WHY YOU NEED IT:

- Important for patients wanting anti-aging support: firm muscles, strong bones, youthful skin, healthy weight, normal blood sugar, and pain reduction
- Essential for patients with falling energy levels and chronic fatigue
- Great for patients with acne and psoriasis
- Targets patients with low hormone levels
- Good for patients with acute and chronic pain, including gastritis (stomach pain), Rheumatoid Arthritis, Osteoarthritis, skin burns, and sunburns
- Supports patients on prescription drugs with specific side effects, such as statin drugs (i.e. Lipitor, Crestor) and bone-building drugs (i.e. Fosamax, Prolia)
- All-natural, non-GMO

HOW IT HELPS:

One of the many reasons that our bodies look older as we age chronologically is that our cellular factories start to slow down production of youth-promoting, structural components. Human cells are programmed to live for a specific amount of time and then they die, needing to be replaced by healthy, new cells.

If your cellular factories cannot keep up with the demand for new cells, then you start to look (and feel) your age.

Can't make billions of muscle cells fast enough? Then you will get weak and flabby muscles. Without replenishing enough skin cells, aging skin becomes crepey and wrinkled.

So, how can you stimulate your cellular factories to keep pumping out youthful levels of healthy cells?

Scientists have discovered that our livers make a very special (but little known) protein called "GG" (GeranylGeraniol). GG functions to support the look and function of youthful muscles, skin, and bones. GG is also necessary to boost energy levels while reducing pain from arthritis, burns, and gastritis.

Additionally, GG supports a robust, youthful metabolism, which is essential for maintaining a healthy weight and blood sugar. GG is also important in keeping our sex hormones (like testosterone) at fresh and buoyant levels.

As we age, our liver naturally starts to make less and less GG. Levels of GG can also be lowered by certain prescription drugs, such as the cholesterol-reducing statins (Lipitor, Crestor, Pravachol, etc.) and the bone-building bisphosphonates (Fosamax, Prolia, etc.). These drugs block the liver's production of GG and thereby promote accelerated aging, higher blood sugars, weight gain, lower hormones, weaker bones, and failing energy.

Not good.

Anti-aging researchers know just how important GG is to manifest a body that looks and feels young and vibrant. GeeWhiz contains 150mg of pure GG from the annatto plant. Now, whether you are taking a prescription drug that lowers GG or want to naturally boost your GG levels, GeeWhiz can be part of your anti-aging strategy so that you can be at your best.

GeeWhiz is powerful support for patients wanting firmer muscles, stronger bones, clearer skin, better energy, hotter metabolism, refreshed hormones, lower blood sugar, and less pain.

GeeWhiz is part of my personal supplement regimen and it deserves to be part of yours, as well.

Usual dosage: one to two capsules with or without food, two to three times daily.
