'Shrooms'

A little 'magic' in every cap

WHAT IT IS:

- A full-spectrum blend of eight medicinal mushrooms for optimal health

WHY YOU NEED IT:

- Supports a healthy immune response
- Impressive antimicrobial properties
- Protects cells from harmful toxins
- Promotes brain function
- Supports detoxification and liver

HOW IT HELPS:

Medicinal mushrooms have been used by traditional healers for millennia because these natural medicines possess truly remarkable properties. Scientists have been researching the effectiveness of our 'Shrooms' for decades and have discovered some of the most important constituents that make mushrooms so critical for human health and healing. Each capsule of 'Shrooms' is packed with the power and promise of these amazing fungi.

With 'Shrooms', you are getting full-spectrum concentrates, not the simple extractions found in most other brands. Lesser brands also pack their capsules with inactive mushroom starch to make you think you are getting more product than you actually are; but in each 'Shroom' capsule, you get over 95% of pure, active mushroom concentrate.

There are so many medicinal mushrooms to choose from, so it can be hard to pick the one that is right for you. In creating 'Shrooms', we made the decision easy by putting in

be well

all eight of the World's most powerful and best known medicinal mushrooms including Reishi, Chaga, Lion's mane, Cordyceps, Maitake, Shitake, Agaricus, and Turkey Tail.

Get your body ready for its best immune health, heart health, brain health, and liver health by starting each day with 'Shrooms.'

Usual dosage: Take three (3) capsules daily on rising, preferably without food.
