Senex

Neutralizing 'Zombies' and Respiratory Viruses

WHAT IT IS:

- A proprietary blend of vitamins and herbs, including an 'uber' absorbable, maximal strength, anti-zombie cell, anti-viral form of Quercetin

WHY YOU NEED IT:

- Important for patients with respiratory, common-cold viruses and COVID
- Great for patients with seasonal and chronic allergies
- Good for patients with nasal congestion, lung congestion, itchy eyes, sneezing
- Important for patients looking to improve athletic performance and recovery
- Targets patients wanting anti-aging support to counteract pro-inflammatory, senescent, 'zombie' cells which increase the risk of disease and degeneration
- Good for patients struggling with chronic fatigue and poor sleep quality
- Great for patients with allergic eye symptoms and eye infections of the conjunctiva and cornea

HOW IT HELPS:

Senex is a best-in-class, proprietary blend of vitamins and herbs that provide comprehensive, powerful anti-aging support, anti-viral support, and anti-inflammatory support.

be well

Senex uses advanced technology to boost the absorption and effectiveness of the phytochemicals that make Senex a next-level biomedicine. One its key ingredients is Quercetin, a phytonutrient naturally found in foods and drinks such as apples, onions, berries, cruciferous veggies, nuts, wine and black tea. Quercetin is a very popular extract and you probably have something like it on your supplement shelf at home. What may surprise you is that Quercetin is very poorly absorbed by the intestinal tract which limits the effectiveness of most of the brands that make it.

Senex uses proven, breakthrough technology to maximize Quercetin absorption and effectiveness by 20 TIMES that of basic Quercetin containing products. Multiple scientific studies have demonstrated that this absorption technology has real-world human benefits including: minimizing symptoms and speeding recovery from the flu, colds, and COVID; improving allergic nose, sinus and eye symptoms; improving energy; improving sleep; improving athletic performance and recovery; and providing powerful anti-aging support.

How can one supplement be so effective across so many different medical conditions?

As a potent biomedicine, the active components of Senex are able to modulate some of the key pathways of inflammation and allergic reactions. Unchecked inflammation is a degenerating force that is capable of breaking down the body prematurely and speeding up the aging process.

Known as the 'Queen' of flavonoids, Quercetin is a plant molecule that activates a plant's survival circuit when it comes under attack from pests or environmental stress (such as drought or severe weather). When we consume these flavonoids, our human 'survival circuit' is also activated and we are also similarly protected.

By modulating inflammatory generating systems (NF-kB, COX, LOX and other cytokines), Senex is able to help the body keep unregulated inflammation from damaging delicate systems. Senex is also a powerful anti-oxidant that can inactivate destructive free radical molecules. As we all learned from the Covid Pandemic, controlling inflammation is at the center of a faster recovery from many viral illnesses.

This is also true in anti-aging medicine. One of the mechanisms of unwanted aging are the adverse effects of 'zombie' cells in our bodies. These 'zombie' cell are known as 'senescent' cells that have outlived their usefulness and are supposed to die...but they don't. Like Zombies, they are not really alive, and they are not really dead. And in this 'zombie-like' state, these senescent cells dump pro-inflammatory molecules into their surroundings and trigger other cells to become 'zombies'...just like in the movies. In mice studies, scientists can take a tiny clump of zombie cells from an old mouse and transplant them under the skin of a young mouse, and then that young mouse will rapidly age into an old mouse.

Whoa, that's not good.

But even if you are not three inches tall, white and furry, this same 'zombie' effect also happens in humans. Senex contains powerful biomedicines to counter the effects of these pro-inflammatory senescent, 'zombie' cells which is one of the key factors in slowing down the aging process.

Additionally, Senex contains NAC and nettle extracts which act as natural antihistamines and counter the effects of IgE allergic antibodies. This can provide powerful relief to allergy sufferers without the side effects of allergy medication.

Senex does all of this (...and more!) by leveraging phytosome technology, a 100% food grade vegan matrix, that allows botanical medicines to be more absorbable and maximally effective.

Usual dosage: Take 1-2 capsules of Senex two to three times daily depending on your symptoms and health goals. Senex can be taken with or without food.
